Introduction

This handbook contains documentation kits designed to support Digital's current, high volume products. The book is divided into two distinct sections. Section I supports option level products; Section II supports "packaged systems". A Table of Contents in the front of the book lists products by their Option Designation, while the Index in the back sorts products by Kit Number.

Packaged System Matrices have been designed for each processor type. The left hand margin of each matrix lists the packaged system designations alphanumerically. The kit numbers run across the top of the matrix. To use the matrix, simply scan the left side of the page for the desired Packaged System Designation and select the kits from the top of the page which have a checkmark. Contents of these kits may be reviewed by locating the appropriate kit in the Index.

The amount and types of documentation available for the individual devices vary depending upon the complexity and application of the device. The advantage of kitting these documents is twofold: 1) it simplifies ordering by reducing the number of line items, and 2) it often reduces expense, since most kits are priced below the sum of their loose piece prices. Prices for Hardware Documentation Kits may be found in Digital's Accessories and Supplies Group Price List.

Orders may be placed through your local Digital Sales Office. In the Continental U.S. and Puerto Rico, orders may also be placed by calling toll free 800-258-1710. When ordering, please provide the Kit Part Number and Kit Name.

More detailed ordering information begins on page iii.

The first of the year was a
 very cold one, and the
 weather was very disagreeable.
 The wind was very strong,
 and the rain was very heavy.
 The snow was very deep,
 and the ice was very thick.
 The frost was very hard,
 and the cold was very severe.
 The sun was very bright,
 and the moon was very full.
 The stars were very clear,
 and the planets were very visible.
 The clouds were very white,
 and the sky was very blue.
 The water was very cold,
 and the ground was very hard.
 The trees were very bare,
 and the leaves were very dry.
 The flowers were very small,
 and the grass was very short.
 The birds were very quiet,
 and the animals were very tame.
 The people were very busy,
 and the work was very hard.
 The day was very long,
 and the night was very short.
 The year was very good,
 and the world was very happy.

New Literature From Digital

Finally! A single reference source of selected Digital hardware and software documentation products. This new directory makes necessary product information readily accessible and it can be used to determine what documentation products are required to support a particular hardware or software option.

The Directory contains:

SOFTWARE DOCUMENTATION PRODUCTS

- Software Documentation Kits
- Source Microfiche Kits
- Software Manuals, Handbooks, Reference Cards

HARDWARE DOCUMENTATION PRODUCTS

- Hardware Manuals
- Maintenance Prints
- Diagnostic Kits

OTHER FEATURES

- Ordering/Pricing Information
- Accessories & Supplies Group Discount Policy
- System Software Organization
- Understanding Digital's Software Numbering Scheme
- Glossary of Software Terms and Abbreviations
- Documentation Index by Ordering Part Number
- Documentation Index by Description

- Do you always have the necessary documentation at your fingertips?
- Do you know which Digital Engineering changes are applicable to your system?

If you can't answer 'yes' to both of these questions, Digital's Maintenance Documentation Service (MDS) can help.

MDS provides almost all service documentation on microfiche: maintenance manuals, illustrated parts breakdowns, diagnostic listings, diagnostic change orders, diagnostic patch orders, wire lists, Field Change Orders (FCO's), Preventive Maintenance (PM) procedures, and a wealth of other useful information.

- Are you always up-to-date with the latest hardware changes? If not, DEC-O-LOG may be the answer!

DEC-O-LOG is a valuable notification service. A subscription to DEC-O-LOG provides essential information for all Digital customers who maintain their own systems. DEC-O-LOG is a summary of Field Change Orders (FCO's) and Engineering Change Orders (ECO's) for your system's CPU's, peripheral options, subassemblies and modules.

To obtain a copy of any of the above literature fill in and cut out the coupon on the opposite page.
